Omkar Suresh Khandalkar

UI/UX Designer

+91 8169191669 oomkarsk6@gmail.com LinkedIn Bē Behance Portfolio

Summary

Product Designer with 3+ years of experience designing AI-driven, enterprise-grade digital experiences end-to-end, from user research and problem definition through prototyping, development handoff, and iteration. Skilled in translating complex enterprise workflows into intuitive, user-centered product experiences while collaborating with product managers, engineers, and stakeholders. Experienced in designing human-in-the-loop AI workflows, creating high-fidelity interactive prototypes, and building scalable Figma design systems. Passionate about simplifying complex workflows, improving usability, and creating accessible digital experiences that help people work more efficiently.

Education

Bachelor of Engineering in Electronics and Telecommunication **2019 – 2023**
Dr. DY Patil's Ramrao Adik Institute of Technology, Mumbai University *CGPA: 8.89/10*

Experience

Zeus Learning **July 2025 – Present**
Senior UI/UX Designer *Mumbai, India*

- Own the **end-to-end product design lifecycle** for an enterprise-grade LMS and CMS, translating user needs, business requirements, and technical constraints into intuitive workflows, interaction designs, and high-fidelity interfaces for students, teachers, and administrators.
- Create user flows, wireframes, and interactive Figma prototypes to explore design solutions, communicate ideas, gather feedback, and refine complex workflows before development.
- Collaborate with 35+ developers, 8 QA engineers, and product managers throughout the product development lifecycle, contributing to sprint planning, feature prioritization, design reviews, and implementation.
- Design AI-assisted workflows and present design concepts and rationale to senior stakeholders and product leadership, incorporating feedback into iterative product improvements.
- Conduct implementation audits against developed interfaces, reducing UI inconsistencies by **40%** and ensuring accurate design delivery across product releases.
- Mentor 3 junior designers on visual design, component documentation, and developer handoff, improving team-wide design-to-development efficiency by **30%**.

Zeus Learning **Aug 2023 – June 2025**
Associate UI/UX Designer *Mumbai, India*

- Designed a **human-in-the-loop AI evaluation workflow** enabling teachers to review open-ended student responses with AI-generated contextual feedback, reducing estimated manual evaluation effort by **60%** while preserving human oversight and control.
- Designed responsive, mobile-first student and teacher experiences, including dashboards, course flows, gradebooks, calendars, and assessment tools, applying WCAG 2.2 accessibility principles.
- Built and scaled a centralized Figma design system with **80+ reusable components**, token-based theming, and standardized interaction patterns aligned with Angular Material, reducing UI inconsistencies by 40%.
- Created high-fidelity mockups and clickable Figma prototypes for usability testing, incorporating user feedback into iterative design cycles to improve task completion and workflow efficiency.
- Conducted competitive analysis across 6+ learning platforms using heuristic evaluation, user interviews, and journey mapping to identify workflow gaps and inform product design decisions.

Organic Signal Media Services **Jan 2023 – Apr 2023**
UX Designer Intern *Mumbai, India*

- Designed interfaces and interaction flows for digital products, applying user-centered design and information architecture principles to improve content structure and navigation.
- Built clickable Figma prototypes and collaborated with developers to translate design solutions into functional interfaces, communicating design decisions throughout implementation and handoff.

Projects

Quantum LMS & CMS – AI-Enabled Enterprise Learning Platform **2023 – Present**
End-to-End Product Design, AI Workflows, Design Systems, Accessibility *Live Product*

- Led end-to-end design of a live enterprise LMS and CMS as the sole primary designer, from competitive research and user discovery through workflow design, prototyping, developer handoff, and implementation QA.
- Designed a **human-in-the-loop AI evaluation console** that shipped in the live product, reducing estimated manual evaluation effort by **60%**.
- Designed responsive, accessible student and teacher experiences, including dashboards, course flows, gradebooks, calendars, assessment tools, and LTI-integrated workflows using WCAG 2.2 principles.
- Built a scalable Figma design system with 80+ reusable components and token-based theming, improving UI consistency and supporting faster design-to-development handoff.

Clio – AI-Powered Investment Portfolio Management **2025**
Conceptual, Conversational AI, Explainable AI, Decision UX *Concept Project*

- Designed an **AI trading assistant** with conversational UX and explainable AI patterns, surfacing data-backed recommendations with transparent reasoning to support informed user decisions.
- Conceptualized **AI-driven Smart Trade workflows** analyzing risk profiles, market conditions, and portfolio gaps to surface explainable recommendations, with an estimated 3x reduction in decision time.
- Mapped AI confidence tiers to distinct interaction patterns, including direct actions, contextual nudges, and watchlist alerts, communicating uncertainty and supporting human oversight.

Technical Skills

Product Design: End-to-End Product Design, Enterprise UX, User-Centered Design, Interaction Design, Visual Design, Workflow Design, Information Architecture, Responsive Design.

AI Product Design: AI-Assisted UX, Conversational UI, Explainable AI, Human-in-the-Loop Workflow Design, AI Confidence Patterns, AI-Assisted Prototyping.

Prototyping & Tools: Figma, Auto Layout, Components, Variables, Interactive Prototyping, Wireframing, Adobe XD, Illustrator, Photoshop, Keynote.

Research & Validation: User Research, User Interviews, Usability Testing, Heuristic Evaluation, Competitive Analysis, Journey Mapping, Persona Development, A/B Testing.

Design Systems & Accessibility: Component Libraries, Design Tokens, Pattern Libraries, Design Documentation, WCAG 2.2, Inclusive Design, ARIA Patterns.

Front-End Engineering: HTML5, CSS3, JavaScript, ReactJS, Next.js, Tailwind CSS, Angular Material.

Collaboration & Delivery: Agile, Sprint Planning, Jira, Design QA, Developer Handoff, Stakeholder Management, Git, GitHub.
